Department is ready to fight and end Malaria during the rainy season

As we are approaching the rainy season whereby we experience a large number of Malaria cases especially in the Mopani and Vhembe Districts of the province, the department is ready and committed to fight this curable yet dreadful disease.

MEC for Health Dr. Phophi Ramathuba will lead the Departmental Malaria fighting team during the launch of the Annual Spraying Campaign.

The department has already established 42 teams which will be dispatched across the province and will target at least 1 million houses between August 2018 and February 2019.

The department calls on the community of Limpopo to cooperate with the spraying teams during the spraying campaign and also urge those with Malaria symptoms to visit the nearby health facilities for treatment.

Media is invited to join the MEC and Malaria spraying teams during the launch scheduled as follows:

Date: Tuesday, 21 August 2018

Venue: Folvhodwe Village, Vhembe District

Time: 11h00

Issued by: Limpopo Department of Health
