

Public Employment Services set to conduct community outreach sessions targeting work-seekers in the Capricorn District – Limpopo Province

The Public Employment Service (PES) unit of the Department of Employment and Labour in Limpopo Province is set to launch a series of community outreach programs dedicated to enriching the youth in the Capricorn District Municipality with valuable information for job-hunting, making informed career decisions, and pursuing training and development opportunities.

Career Guidance Coordinator, Emmanuel Ravhudzulo, said the primary objectives of these sessions is to among others, assist job-seekers with information that will enhance their career insights and bolster their employability through a range of job-hunting skills programs covering aspects such as CV writing, interview preparation, and work ethics.

During these sessions, unemployed job-seekers will receive comprehensive support and guidance on various strategies to secure employment or access skills development opportunities, and will also be registered on the Employment Services of South Africa (ESSA) database for possible future employment.

Ravhudzulo noted, "We are dedicated to helping individuals who find themselves at a career crossroad and are unsure about their next steps, whether it involves embarking on their initial career journey, advancing in their current profession, or exploring new career paths."

Work seekers are encouraged to bring along their CV's to the sessions.

The outreach will take place according to the attached schedule:
