LIMPOPO HEALTH MEC DR. PHOPHI RAMATHUBA EXPANDS 24-HOUR HEALTHCARE SERVICES TO PHIPHIDI CLINIC

Limpopo Health MEC, Dr. Phophi Ramathuba is set to activate 24-hour healthcare services at Phiphidi Clinic, a move aimed at benefiting the residents of Phiphidi village and surrounding areas in the Thulamela Local Municipality, Vhembe District.

The activation of round-the-clock medical services at Phiphidi Clinic is a proactive step to meet the growing demand for accessible healthcare, especially in rural communities where patients often face long journeys to receive medical attention. This initiative marks a significant advancement in our healthcare system, ensuring that medical care is more accessible and providing reassurance to patients and their families who will now have continuous access to healthcare services.

"As communities, it's important that we protect and cherish these invaluable resources because they are established for the benefit of all. It is disheartening to hear reports of incidents where our staff members and security personnel are attacked while on duty at clinics, as this negatively impacts their morale and the delivery of services to the community," emphasized MEC Ramathuba.

MEC Ramathuba continues to call on traditional leaders and the community to support and safeguard these clinics, recognizing their crucial role in delivering healthcare services.

The activation of 24-hour healthcare services at Phiphidi Clinic is scheduled as follows:

Date: Tuesday, 27 February 2024

Venue: Phiphidi Clinic (Thulamela Local Municipality - Vhembe District)

Time: 12:00
