LIMPOPO PROVINCIAL TREASURY SUCCESSFULLY HOSTS SUPPLIERS INFORMATION HELP DESK IN FETAKGOMO-TUBATSE

31 August 2026

The Limpopo Provincial Treasury, through the Sekhukhune District Supply Chain Management (SCM) Client Support Centre, successfully hosted a Suppliers Information Help Desk from 24 to 26 August 2026 within the jurisdiction of the Fetakgomo-Tubatse Local Municipality, Sekhukhune District. Help Desk were set-up in Moroke, Apel and River Cross respectively.

The initiative formed part of the Province's District Development Model (DDM) Integrated Service Delivery Programme, which seeks to bring government services closer to communities and ensure that citizens and local businesses have improved access to government support and information.

Over the three-day period, the Sekhukhune District SCM team assisted more than 60 walk-in suppliers who visited the Help Desk seeking assistance on a range of Supply Chain Management and Central Supplier Database (CSD)-related matters.

Of the suppliers assisted, 20 were young people, while women accounted for approximately 60 percent of the total number of suppliers who accessed the service. This level of participation demonstrates the continued interest among local businesses, particularly women and youth-owned enterprises, in accessing opportunities and ensuring compliance with government supplier requirements.

Suppliers approached the Help Desk for assistance with various matters, including updating their supplier information, uploading proof of address, reviving companies undergoing the de-registration process, and understanding how to respond to Requests for Quotations (RFQs) through the Central Supplier Database online functionality.

Limpopo Provincial Treasury welcomes the positive response from local suppliers and appreciates the interest shown in the services provided through the Help Desk.

The Province remains committed to ensuring that suppliers are supported with relevant information and guidance to enable them to participate meaningfully in government procurement processes.

Suppliers are encouraged to visit Limpopo Provincial Treasury District Offices across the Province for assistance and to remain on the lookout for upcoming supplier training programmes and other support initiatives, which are communicated through the Province's official social media platforms.

The successful hosting of the Suppliers Information Help Desk is a demonstration of government's commitment to taking services directly to communities and

strengthening collaboration between government and the local business sector in support of inclusive economic development.
